

# APPLICATION OF DIGITAL TECHNOLOGY IN Covid-19 PLANNING PANDEMIC AND RESPONSE

- Covid-19 has affected the life of students in a very serious way.
- Learning has taken in different ways online through different apps.

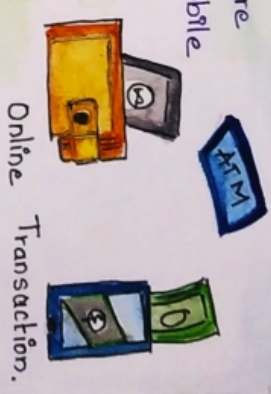

- We can attend seminars online famously known as WEBINAR.

- Apps like Audio book, Video lessons E-learning and other educational apps have helped students in their daily routine with their learning.

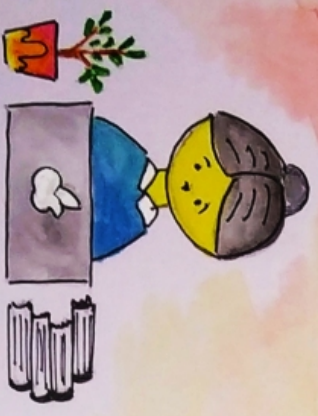

→ Not only in the Education sector even in the banking digital technology is used widely. So many secured apps have been launched for virtual or online banking.

→ Therefore transactions as deposits, withdrawals, inquiries and transfers are taken online through mobile banking or through other means if necessary.

★ High spread of Covid has forced all of us to be safer in our homes. This has made us get dependent on online for food also. Swiggy, Zomato or Uber eats are famous for their food delivery.

- ▶ Even job interviews are held online. As interviewer will schedule a specific time using programme like SKYPE, GOOGLE MEETS OR ZOOM.

Work from home. other online job interviews.

- ▶ Covid has also encouraged work from home means an employee working from their house, apartment or place of residence rather than working from the office.

• Online registering for Covid vaccination has also been very useful for many people. Even to find nearby places for vaccination centre.

• Also online shopping has been encouraged.
